Early Human Development, 16 (1988) 305—307
Elsevier Scientific Publishers Ireland Ltd.

Subject index

abnormalities (congenital defects), infant (low birth weight), fetal death, infant mortality, infant mortality, 173
adrenaline, noradrenaline, pancuronium, preterm infants, artificial ventilation, 219
anion exchange, rectal dialysis, bicarbonate, chloride, 213
apnoea, preterm, 235
artificial ventilation, noradrenaline, adrenaline, pancuronium, preterm infants, 219

bacteria, preterm milk, human milk, gastric pH, 27
behavioural problems, diabetes mellitus, knowledge, glycosylated haemoglobin, 245
bicarbonate, anion exchange, rectal dialysis, chloride, 213
birth order, growth, maturation, sex, breast-feeding, smoking, 163
body movement, static charge sensitive bed, sleep, infant, 283
brain bilirubin, hyperbilirubinemia, kernicterus, evoke potentials, 185
brain weight, metabolic rate, small-for-gestational age, oxygen consumption, 253
breast-feeding, growth, maturation, sex, birth order, smoking, 163
breast feeding, gastrin, somatostatin, milk production, 293

caesarean childbirths, psychosocial out-come, follow-up, maternal morbidity, mother-infant adaptation, 271
cerebral palsy, periventricular leukomalacia, infant brain, ultrasound, magnetic resonance imaging, 225
chloride, anion exchange, rectal dialysis, bicarbonate, 213

desmosine, elastin, lung development, fetus, hyaline membrane disease, fetal growth retardation, 61
diabetes mellitus, behavioural problems, knowledge, glycosylated haemoglobin, 245

elastin, desmosine, lung development, fetus, hyaline membrane disease, fetal growth retardation, 61
electromyography, expiration, premature, 55
evoke potentials, hyperbilirubinemia, kernicterus, brain bilirubin, 185
expiration, electromyography, premature, 55
extensive cystic leukomalacia, head growth, intraventricular haemorrhage, 207

fetal death, infant (low birth weight), abnormalities (congenital defects), infant mortality, infant mortality, 173
fetal development, GFU-GEMM, Interleukin 3, 195
fetal growth retardation, elastin, desmosine, lung development, fetus, hyaline membrane disease, 61
fetal movements, real-time ultrasound, inter-individual differences, intra-individual differences, normal pregnancy, first half of gestation, 85
fetus, elastin, desmosine, lung development, hyaline membrane disease, fetal growth retardation, 61
first half of gestation, fetal movements, real-time ultrasound, inter-individual differences, intra-individual differences, normal pregnancy, 85
follow-up, caesarean childbirths, psychosocial out-come, maternal morbidity, mother-infant adaptation, 271
follow-up evaluation, selection biases, infant development, neonatal intensive care, 13
full-term, pregnancy hypertension, neurological condition, preterm, 107

gastric pH, preterm milk, human milk, bacteria, 27
gastrin, breast feeding, somatostatin, milk production, 293
GFU-GEMM, fetal development, Interleukin 3, 195
glycosylated haemoglobin, diabetes mellitus, behavioural problems, knowledge, 245
growth, maturation, sex, birth order, breast-feeding, smoking, 163

head growth, extensive cystic leukomalacia, intraventricular haemorrhage, 207

heart rate, heart rate variability, P_aO_2, P_aCO_2, neonate, respiratory distress syndrome, 3
heart rate variability, heart rate, P_aO_2, P_aCO_2, neonate, respiratory distress syndrome, 3
human milk, preterm milk, bacteria, gastric pH, 27
hyaline membrane disease, elastin, desmosine, lung development, fetus, fetal growth retardation, 61
hyaline membrane disease, pulmonary surfactant, phospholipids, 143
hyperbilirubinemia, kernicterus, evoke potentials, brain bilirubin, 185

infant, SIDS, pulmonary surfactant, phospholipids, 153
infant, static charge sensitive bed, sleep, body movement, 283
infant (low birth weight), abnormalities (congenital defects), fetal death, infant mortality, infant mortality, 173
infant brain, periventricular leukomalacia, ultrasound, cerebral palsy, magnetic resonance imaging, 225
infant development, follow-up evaluation, selection biases, neonatal intensive care, 13
infant mortality, infant (low birth weight), abnormalities (congenital defects), fetal death, infant mortality, 173
inter-individual differences, fetal movements, real-time ultrasound, intra-individual differences, normal pregnancy, first half of gestation, 85
interleukin 3, GFU-GEMM, fetal development, 195
intra-individual differences, fetal movements, real-time ultrasound, inter-individual differences, normal pregnancy, first half of gestation, 85
intraventricular haemorrhage, head growth, extensive cystic leukomalacia, 207

kernicterus, hyperbilirubinemia, evoke potentials, brain bilirubin, 185
knowledge, diabetes mellitus, behavioural problems, glycosylated haemoglobin, 245

labor, vacuum extraction, retinal hemorrhages, tractive force, 263
lung development, elastin, desmosine, fetus, hyaline membrane disease, fetal growth retardation, 61

magnetic resonance imaging, periventricular leukomalacia, infant brain, ultrasound, cerebral palsy, 225
maternal morbidity, caesarean childbirths, psychosocial out-come, follow-up, mother-infant adaptation, 271
maturation, growth, sex, birth order, breast-feeding, smoking, 163
metabolic rate, brain weight, small-for-gestational age, oxygen consumption, 253
milk production, breast feeding, gastrin, somatostatin, 293
mother-infant adaptation, caesarean childbirths, psychosocial out-come, follow-up, maternal morbidity, 271
mother-infant interactions, newborn infant, tactile stimulations, 119

neonatal hyperbilirubinaemia, nutritive sucking, 73
neonatal intensive care, follow-up evaluation, selection biases, infant development, 13
neonate, heart rate, heart rate variability, P_aO_2, P_aCO_2, respiratory distress syndrome, 3
neurological condition, pregnancy hypertension, preterm, full-term, 107
newborn infant, mother-infant interactions, tactile stimulations, 119
noradrenaline, adrenaline, pancuronium, preterm infants, artificial ventilation, 219
normal pregnancy, fetal movements, real-time ultrasound, inter-individual differences, intra-individual differences, first half of gestation, 85
nutritive sucking, neonatal hyperbilirubinaemia, 73

oxygen consumption, metabolic rate, brain weight, small-for-gestational age, 253

pancuronium, noradrenaline, adrenaline, preterm infants, artificial ventilation, 219
parent-infant vocal interaction, preverbal behavior, sex differences, 35
periventricular leukomalacia, infant brain, ultrasound, cerebral palsy, magnetic resonance imaging, 225
phospholipids, hyaline membrane disease, pulmonary surfactant, 143
phospholipids, SIDS, infant, pulmonary surfactant, 153
pregnancy hypertension, neurological condition, preterm, full-term, 107
premature, electromyography, expiration, 55

prematurity, thyroid function, 131
preterm, apnoea, 235
preterm, pregnancy hypertension, neurological condition, full-term, 107
preterm infants, noradrenaline, adrenaline, pancuronium, artificial ventilation, 219
preterm milk, human milk, bacteria, gastric pH, 27
preverbal behavior, parent-infant vocal interaction, sex differences, 35
psychosocial out-come, caesarean childbirths, follow-up, maternal morbidity, mother-infant adaptation, 271
$P_{tc}O_2$, heart rate, heart rate variability, **$P_{tc}CO_2$**, neonate, respiratory distress syndrome, 3
$P_{tc}CO_2$, heart rate, heart rate variability, **$P_{tc}O_2$**, neonate, respiratory distress syndrome, 3
pulmonary surfactant, hyaline membrane disease, phospholipids, 143
pulmonary surfactant, SIDS, infant, phospholipids, 153

real-time ultrasound, fetal movements, inter-individual differences, intra-individual differences, normal pregnancy, first half of gestation, 85
rectal dialysis, anion exchange, bicarbonate, chloride, 213
respiratory distress syndrome, heart rate, heart rate variability, **$P_{tc}O_2$**, **$P_{tc}CO_2$**, neonate, 3
retinal hemorrhages, vacuum extraction, tractive force, labor, 263

selection biases, follow-up evaluation, infant development, neonatal intensive care, 13
sex, growth, maturation, birth order, breast-feeding, smoking, 163
sex differences, preverbal behavior, parent-infant vocal interaction, 35
SIDS, infant, pulmonary surfactant, phospholipids, 153
sleep, static charge sensitive bed, body movement, infant, 283
small-for-gestational age, metabolic rate, brain weight, oxygen consumption, 253
smoking, growth, maturation, sex, birth order, breast-feeding, 163
somatostatin, breast feeding, gastrin, milk production, 293
static charge sensitive bed, sleep, body movement, infant, 283

tactile stimulations, newborn infant, mother-infant interactions, 119
thyroid function, prematurity, 131
tractive force, vacuum extraction, retinal hemorrhages, labor, 263

ultrasound, periventricular leukomalacia, infant brain, cerebral palsy, magnetic resonance imaging, 225

vacuum extraction, retinal hemorrhages, tractive force, labor, 263
